PrintSmart

CostControl

SecurePro

Optimised print for any organisation

PrintSmart Cost Control provides organisations with complete visibility over 'what, when and how much' each staff member prints - providing greater control over printing expenditure.

A simple user interface delivers greater insight into print usage - enabling easy print management, tracking and control to help reduce print costs and optimise operational efficiency.

How PrintSmart Cost Control and Secure Pro benefit any organisation

PrintSmart Secure Pro is designed to be seamlessly integrated into your existing IT infrastructure, enabling your IT staff to significantly enhance print security whilst reducing print costs.

The pull printing* feature also adds another layer of security by only allowing the release of a print job from a chosen printer after authentication via PIN code or ID card.
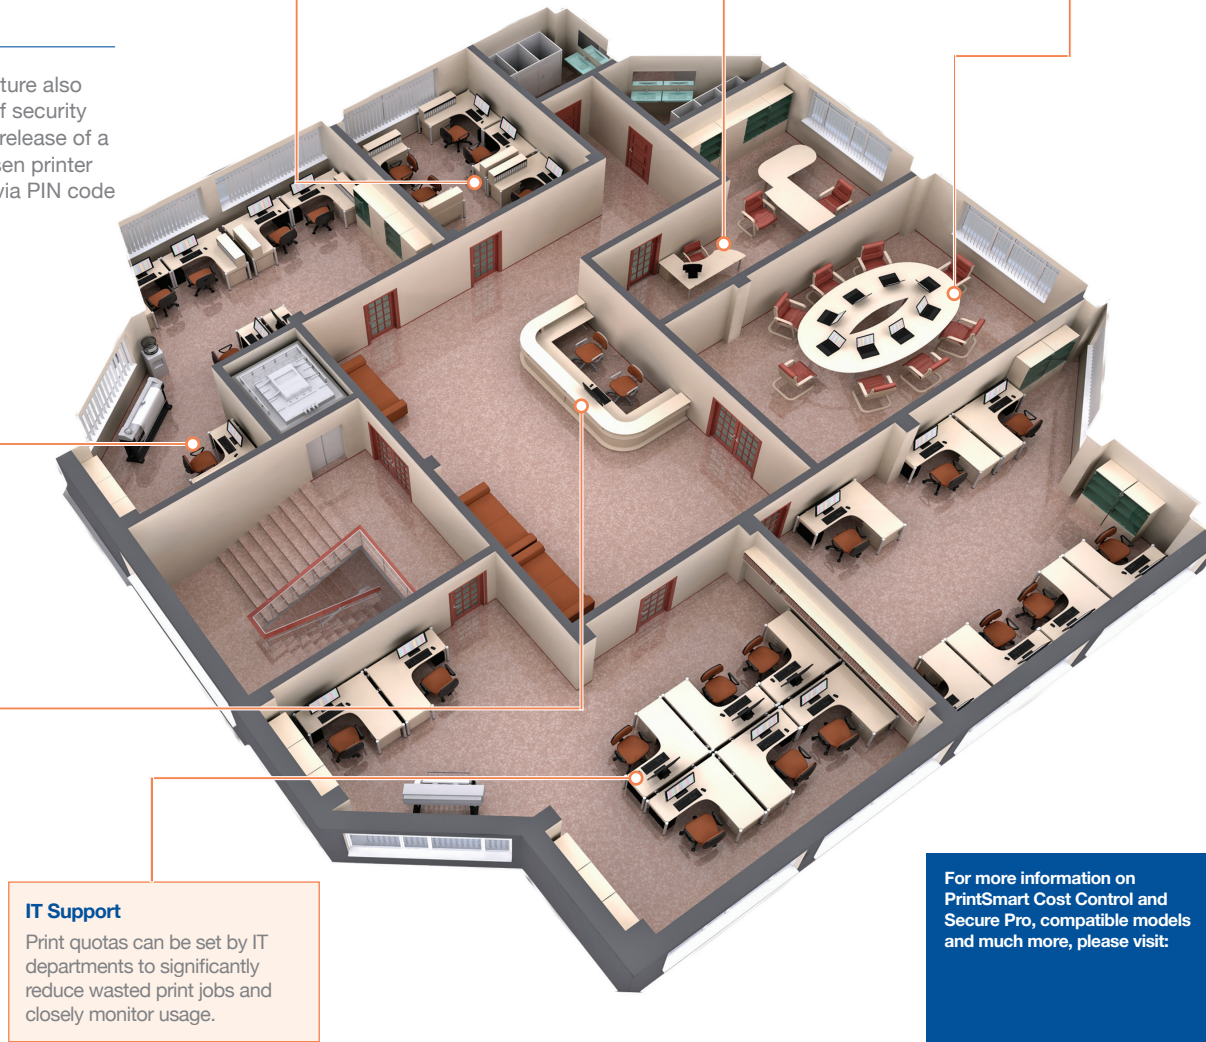

HR Department
Pull printing* utilises PIN code authentication so that HR departments can print sensitive documents such as pay slips without fear of an unauthorised print collection.

Finance Department
Using the Reporting toolset, Finance Managers gain greater visibility on how much employees are printing to help control the organisation's printing resources.

Boardroom
Using Mail2Print*, users can submit or scan documents to multiple email addresses and collect their print jobs after authenticating at a printer. This is extremely useful for visiting colleagues or customers.

Marketing & Sales
Secure function lock* restricts functions of the device to different users. Once a user is authenticated, only the functions they are allowed to use will be made available.

Reception
When deliveries are received, the receptionist can simply use ScanDirect* to easily scan the delivery note to their email address and then forward it to relevant employees.

IT Support
Print quotas can be set by IT departments to significantly reduce wasted print jobs and closely monitor usage.

Who benefits from PrintSmart Cost Control and Secure Pro

SMBs
Controlling operational costs is vital to small and medium sized businesses (SMBs). PrintSmart Cost Control and Secure Pro offers IT an easy-to-use and cost-effective way to manage printer fleets - providing accurate reporting to help save costs and increase productivity.

Education
In today's educational environment more emphasis is placed on saving costs and helping to reduce the impact on the environment. PrintSmart Cost Control and Secure Pro allows system administrators to set print quotas for pupils, enforce duplex printing and lock functions of a machine to certain users.

Healthcare
PrintSmart Cost Control and Secure Pro looks to address today's printing challenges within Healthcare, where patient information and privacy must be protected. It provides a secure and convenient solution to mitigate the risk of patient-protected health information (PHI) falling into the wrong hands.

Legal
In the hectic environment that surrounds the legal profession, legal documents can be easily forgotten and remain unbilled to the client. PrintSmart Cost Control and Secure Pro allows each print job to be assigned a billing code to ensure that all printed documents are charged to the client.
